

Nissan Cohen

Engineering Manager & Tech Lead · Israel

✉ nissanc6@gmail.com ☎ 050-786-3027 💼 [linkedin.com/in/-nomiki](https://www.linkedin.com/in/-nomiki) 🐙 github.com/Nomiki

SUMMARY

Engineering manager with 4+ years leading fullstack teams at high-growth B2B SaaS companies, with a hands-on technical style, spending roughly half my time in the code. Track record of building high-performing teams, shipping AI-powered product features, and driving architectural improvements across complex domains. Focused on growing engineers, raising delivery quality, and aligning technical work with business goals.

TECHNICAL SKILLS

- **Frontend:** Vue.js, React, Svelte, Angular
- **Backend:** Node.js, .NET Core, Java, Scala, Ruby
- **Databases:** MSSQL, MongoDB, Elasticsearch, Redis
- **Infrastructure:** Docker, AWS, RabbitMQ, Kafka
- **Other:** Microservices architecture, AI/ML integration (fine-tuned classification, embeddings)

MANAGEMENT SKILLS

- Team leadership & mentorship
- Hiring & team building
- Agile / Scrum delivery
- Cross-functional collaboration (Product, Data)
- Technical architecture & hands-on code review
- Quarterly roadmap planning & stakeholder communication

EXPERIENCE

Software Engineering Team Lead → Wix

August 2025 – Present · Tel Aviv, Israel

- **Team Leadership** - Managing a team of 3 developers in the Bookings domain, responsible for core scheduling and appointment product features

Software Engineering Team Lead → Tipalti

January 2022 – August 2025 · Tel Aviv, Israel

- **Team Leadership** - Managed a fullstack team of 8 (6 developers, 2 QA engineers) responsible for core invoice processing workflows
- **System Architecture** - Led the architectural transition from monolith to microservices within the domain; championed and delivered the first Node.js microservice adopted across the engineering group
- **AI/ML Integration** - Drove delivery of two AI-powered product features: a fine-tuned classification model for PO Matching routing, and an embedding-based similarity algorithm that improved automatic PO Matching accuracy
- **Hiring & Onboarding** - Hired multiple engineers onto the team; owned onboarding and training end-to-end to accelerate ramp-up
- **People Development** - Held regular 1-on-1s with all 8 team members focused on personal growth, career progression, and mentorship
- **Mentorship** - Grew two engineers: mentored a senior engineer into a domain lead role, and advanced a junior engineer to mid-level
- **Cross-functional Collaboration** - Collaborated with Product on quarterly roadmap planning and with the Data team on the AI-powered features

- [Production Ownership](#) - Built a culture of production awareness across the team through a weekly on-call rotation, improved investigation tooling, and JIRA MCPs; personally owned incident triage and customer-facing escalations for the domain
- [Process Improvement](#) - Established code review standards and feature planning templates to raise consistency and quality across the team

Senior Fullstack Developer → Tipalti

June 2020 – January 2022 · Tel Aviv, Israel

- [Algorithm Development](#) - Designed and built core PO Matching algorithms and owned the end-to-end UI/UX for the feature
- Delivered several meaningful features across the Invoice journey before transitioning to the team lead role

Software Engineer → Hysolate

June 2017 – May 2020 · Tel Aviv, Israel

- Engineered core components of a hypervisor-based endpoint security product that isolated corporate devices into separate VMs, each with independent network and resource policies
- [Technical Ownership](#) - Owned the management server, the central admin console for IT teams to configure VM blueprints and device policies at scale

Software Engineer & Automation Engineer → VMware

March 2015 – June 2017 · Herzliya, Israel

- Worked across software engineering and automation engineering roles within VMware's product teams

EDUCATION

Bachelor's Degree, Computer Science The Academic College of Tel-Aviv, Yaffo · 2014 – 2019

LANGUAGES

Hebrew (Native) · English (Full Professional)
